Please read the instructions carefully before using the product and keep for future reference.

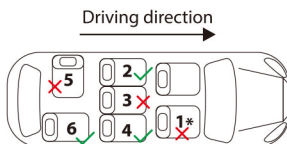

This is a "Semi-Universal" child restraint. It is approved to Regulation No. 44-04 series of amendments, for general use in vehicles and it will fit most, but not all, car seats. A correct fit is possible if the vehicle manufacturer has declared in the vehicle handbook that the vehicle is capable of accepting a "Semi-Universal" child restraint for this age group. This child restraint has been classified as "Semi-Universal" under more stringent conditions than those which applied to earlier designs which do not carry this notice.

"Only suitable if the approved vehicles are fitted with 3 point/static/with retractor safety-belts."

This combination seat for children from 0-36 kg totally meets or exceeds safety standards and has been certificated to ECE R44. Proper use contributes to the effectiveness of the product. To avoid accidental injuries, please rigorously follow the instruction when you install and use the child safety seat.

Child Safety Seat Placement

Approved to ECE R44	
Groups	Recommended Weight

Correct installation/ fit ✓

Incorrect installation/ error ✗

Warning:

Bon Voyage child restraint is only for children from 0 to 36kg.

Only suitable if the approved vehicle is fitted with 3 point/static/with retractor safety-belts, approved to ECE R44 or other equivalent standards.

The vehicle seat faces forward. If your own car belt used to help assemble, Rearward-facing restraint is forbidden to the seats with bags in front.

The safety restraint is secured by seat belts of the car. Never being twisted, all the belts must be adjusted to the child and handled to allow the child to be easily moved into and out of the car.

The safety harness must be worn to fasten the child.

The seat must be fully locked. Should be able to move the child out of the seat in a prompt way under any emergency.

Replacement of child restraints is recommended following a moderate or severe crash in

order to ensure a continued high level of protection for child passengers.

Additional parts or modifications are not recommended, they are highly unlikely to affect

future child safety seat performance.

Keep the seat away from direct sun. The safety seat can become very hot if left in the sun and contact with these parts can burn your child's skin.

Never leave your child alone in the seat and unwatched.

The backrests of the car should be adequately secured and there should be no object on them. (risk of injury)

Never use this safety seat without the cover. The cover is a must for the safety seat.

Child restraint must be used properly and other methods outside the book are not recommended.

Do not use this safety seat at home, and it is only recommended for a vehicle.

Keep the seat away from any corrosive substances.

The user must be informed about how to assemble and install the elastic and rigid parts of the restraint, so as to avoid getting stuck in normal use.

The operation methods of strap and regulation arrangements must be thoroughly understood before using.

The straps connecting to the vehicle must be tightened and the strap for restraining the child should be adjusted to the child without any discomfort caused.

The methods for washing the child restraint system are provided below.

Any modification on the product is highly dangerous.

The luggage and objects which could easily cause damage in a crash should be properly placed.

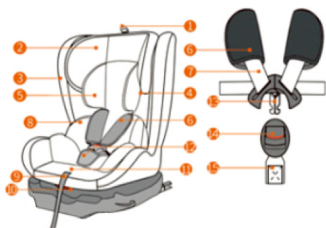

The instruction of the product must be maintained within its life cycle.

The ISOFIX fixing instruction should be understood before using.

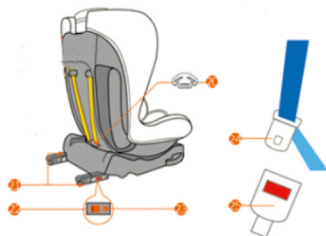

The rigid items and plastic parts of a child restraint shall be so located and installed

that they are not liable, during everyday use of the vehicle, to become trapped by a movable seat or in a door of the vehicle.

In the case of rearward facing systems it is advised not to use them in seating positions where an active frontal airbag installed.
