This manual should be kept in a safe and accessible place. In order to improve the quality of the products, we can change part of the structure and appearance of the products without informing them, please kindly understand.

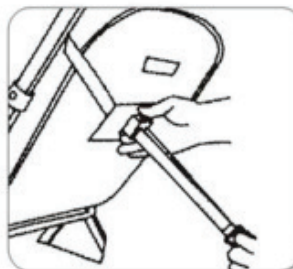

## Installation Instructions

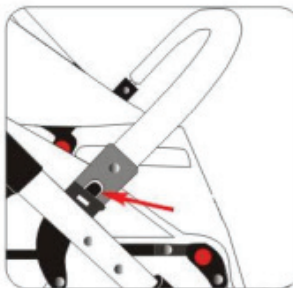

**Expand Operations:** Take it out from the box, open the fixed hook on the side of the car, hold the top of the push handle in hand, lift the push handle upwards and slightly unfold outward. Make sure the car is ready for use.

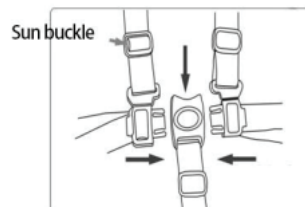

You can adjust the sitting posture and sleeping posture under different conditions by pulling the foot pallet forward and releasing it downward at the same time.

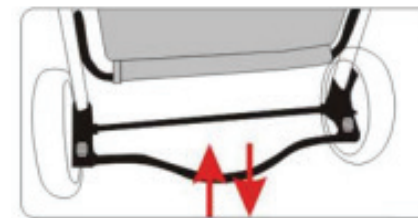

**Backrest Height Adjustment:** When one hand holds the lower end of the adjustment buckle, the other hand holds two sides of the adjustment buckle. Switch tightly to make the buckle relaxed and then push the adjustment buckle up and down, adjust to the appropriate angle and then open the adjusting buckle which is in a locked state. The operation is complete.

**Handrail Operation:** For the convenience of the baby in and out, this car is designed for disassembling the handrail, press the buttons on the left and right sides, and then pull out the handrail with a little strength, then it can be disassembled. On the contrary, insert it directly to make the button pop up, and do not pull it out with force that is, the installation is successful.

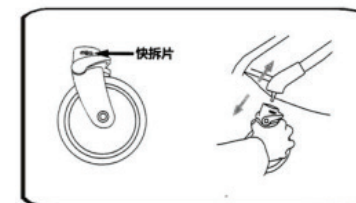

**Use of Safety Belt:** After putting the child into the cart seat, buckle the left and right shoulder belts through the shoulder chest and bet, and then close the straddle belt between the children's legs and the left and right shoulder belts and belts, and the sound of "clicking" is heard; the length of shoulder belt and belt can be adjusted by pulling up and down the length of the webbing in the "Sun buckle"; Safety belt unlocking: press the Heart unlock button, the parts of the safety belt will be separated automatically, and the shoulder belt, belt and straddle belt will be separated naturally.

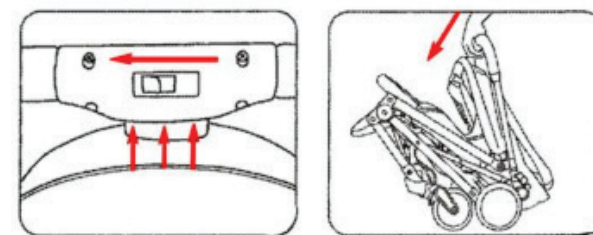

**Rear Wheel Brake Operation:** After gently stepping down the rear wheel brake lever, the car is in a brake state and cannot be carried out. Lift up the brake lever to release the brake state.

Warning: when the car does not move, in case the car slips out. You must step on the brake lever to make the car in the braking State.

Assemble the front wheel shaft. Turn the front wheel slightly to check whether the rotation is flexible. If it cannot be pulled out, it is qualified. When removing, pull out the bottom of the front wheel axle sleeve.

**Closing Operation:** Hold the lock piece on the push handle by hand, press the button of the second lock on the right thumb and at the same time, the other four fingers hold the button of closing the car upwards, push to the front and bottom of the car and the car will fall down and close, hang up the side car hook and the process is complete.
